International Construction Law

LL.M. - MASTER OF LAWS, MLS - MASTER OF LEGAL STUDIES

Program Content and Objectives

The part-time programs International Construction Law (LL.M./MLS) are providing continuing legal education in the field of legal affairs with a special focus on international construction law. In order to achieve the highest possible practical gain for its participants, the program combines an education at the highest academic standard with a focus on the areas needed most in daily business, including economic aspects, project management, value engineering and alternative dispute resolution.

High-profile experts from the academic and professional world in Austria and abroad convey state-of-the-art knowledge, which will enable the students to deal with the international construction sector's legal customs professionally and to meet the changing challenges of the international construction industry. Intensive team work in small groups as well as case-based learning proved to be very efficient learning strategies.

Graduates of this Master Programs will be able to successfully complete challenging construction projects abroad.

UNIV.-PROF. I.R. DR. MANFRED STRAUBE SCIENTIFIC DIRECTOR

"The specialization in application-oriented areas of law – like e.g. in Law of International Construction Contracts – is one of the outstanding objectives of continuing education at the University of Vienna and its Faculty of Law."

Target Group

Due to an increasing volume in construction work abroad and the continuing globalization of the construction industry, the need for qualified lawyers working on an international level in this sector is constantly rising. However, also professionals – like e.g. civil engineers and construction economists – who are usually not involved in legal matters customarily deal with negotiations and implementation of contracts. Therefore, well-founded knowledge of international construction law as well as background knowledge of construction and standard contract forms is essential for successful completion of challenging construction Law (LL.M./MLS) are a reaction to this demand in the construction sector. "From an engineer's point of view I can say: The program "International Construction Law" provides essential background information for the daily work with construction contracts and enables "the practitioner" to understand international construction conditions and their particularities."

ING. ALEXANDRA WURST - STUDENT, INTERNATIONAL CONSTRUCTION LAW" (MLS)

Admission Criteria

Admission to the Postgraduate Program International Construction Law requires the completion of a law degree (LL.M) from a university in Austria or abroad, or a degree from a university in Austria or abroad in the area of civil engineering, construction management, economics or any other degree which is comparable with one of the above mentioned national or international degrees (MLS).

- Students who do not have an academic degree but who have 5 years of professional experience in an executive position may also apply (matriculation standard required); the Scientific Director will decide about admission.
- Non-native speakers and applicants whose first law degree program was not taught in English are required to provide a proof of advanced English language proficiency.

Contents
