### Official conference publisher

The world population is growing fast and continuously using more of the dwindling non-renewable energy resources of petroleum, coal, and natural gas. These resources are not only being rapidly exhausted, but their compounded use is severely damaging our environment and seriously jeopardizing the future sustainability of planet earth. If humans are to survive, renewable and clean sources of energy should be used on a massive scale replacing the ruinous fossil fuels. Current energy-driven world development has been chaotically progressing at the expense of environmental sustainability. TerraGreen12 aims at providing a milieu for experts and researchers to share their knowledge and expertise in the fields of clean and renewable energy and come up with working solutions toward a cleaner and greener globe.

### Topics of interest include, but are not limited to

#### Renewable Energy

*Solar, Wind, Geothermal, Biomass & Waste, Hydro-power, Tidal Wave, Hydrogen, and Hybrid Systems.*

#### Energy Management

*Energy Transport and distribution, Transformation Efficiency, Energy Recovery Systems, Power Management, Energy modeling and forecasting, Computation Techniques, Control and Monitoring, Energy Conservation, Energy saving equipments.*

#### Governmental Policies

*Incentives for Development, Laws and Regulations, Social and Economic Impacts.*

#### Environmental Impact

*Environmental Protection, Climate Change Monitoring, Water Resources Conservation, Pollution.*

#### Education

*Media, Technologies, Funding, Organizations.*

### Submissions

Researchers from all over the world with interests in clean energy and sustainable environment are cordially invited to participate in the TerraGreen12 conference by submitting a one page abstract written in English and prepared in pdf format for oral or poster presentations at:

<https://www.easychair.org/account/signin.cgi?conf=terragreen12>

### Important deadlines

Dear colleague,

You are cordially invited to participate in and attend the TerraGreen12 International Conference on Clean Energy Solutions for Sustainable Environment, to be held February 16-19, 2012 in Beirut, Lebanon.

Conference Topics of interest include, but are not limited to:

Renewable Energy

Solar, Wind, Geothermal, Biomass & Waste, Hydropower, Tidal Wave, Hydrogen, and Hybrid Systems.

Energy Management

Energy Transport and distribution, Transformation Efficiency, Energy Recovery Systems, Power Management, Energy modeling and forecasting, Computation Techniques, Control and Monitoring, Energy Conservation, Energy saving equipments.

Governmental Policies

Incentives for Development, Laws and Regulations, Social and Economic Impacts.

Environnemental Impact

Environnemental Protection, Climat Change Monitoring, Water Resources Conservation, Pollution control.

Education

Media, Technologies, Funding, Organizations.

You are cordially invited to participate in the TerraGreen12 conference by submitting a one page abstract written in English and prepared in pdf format for oral or poster presentations at:

<https://www.easychair.org/account/signin.cgi?conf=terrager12>

Abstract submission deadline is: June 20, 2011

You may forward the attached call for papers to other colleagues and researchers whose fields of interest are related to the conference topic.

We look forward to receiving your contributions.

Sincerely yours,  
TerraGreen12 conference General Chair,  
Pr. Gaby KHOURY
